

## WARRANTY REGISTRATION

### Congratulations on your new Waterboy solar pump!

You've just purchased one of the best solar pumps on the market. It's a great investment and, with proper care, your unit will provide reliable water for many years.

#### 4-Year Warranty. Zero Worries.

Waterboy pumps are built for the long haul, and we back that up with a 4-year warranty for your peace of mind. When you purchase through your local Waterboy dealer, you're not just buying a pump – you're getting reliable performance and local support you can trust.

If you purchased a complete system through an Authorised Waterboy Dealer your pump comes with a **4-year warranty**, so please be sure to **register your pump by entering your details below** to activate your coverage.

If you only purchased a drive pack to use with existing solar panels the pump still comes with 3 years warranty so please register below.

### Serial Number & Records

Your pump's serial number can be found:

- On the **pump carton**
- On the **terminal block of the controller above the motor input**, or
- On a **loose label inside the pump carton**.

Please record this serial number and keep it in a safe place for your records.

### Warranty Activation Requirements

To activate your warranty, we require 3 clear photos of your installation. Email this completed form and the photos to [info@waterboypumps.com.au](mailto:info@waterboypumps.com.au).

Please take photos showing:

- The **pump installation**
- The **controller and wiring**
- The **solar array and overall system layout**.
